

Seizure/Epilepsy Brain WO

Reviewed By: Justin Waters, MD

Last Reviewed: January 2020

Contact: (866) 761-4200, Option 1

Use: Suspect mesial temporal sclerosis or long standing seizures.
DO NOT use for first time seizure, perform routine brain. For all non-contrast brain MRIs, a sagittal pre-contrast T1 should be performed in addition to sag MPRAGE. Currently, some MHS sites are only doing the MPRAGE

Sequences:

- Cor MPR angled through temporal lobes to include whole brain
- Ax Diffusion
- Ax FLAIR
- Ax T1
- Ax T2
- Ax T2*
- Cor thin FLAIR through temporal lobes
- Cor thin T2 through temporal lobes
